Paper Tiger Document Solutions will bring their shred truck to shred your sensitive documents securely.

Please remember these important tips for quick shredding:

- **1.** The shredder can only take paper; you will need to take back any bags or boxes you bring to the bin
- **2.** Staples, paper clips and the like do not need to be removed. You must, however, remove butterfly clips.
- **3.** Three ring binders and the like cannot be put into the machine. Paper in any binders will need to be removed prior to shredding.
